EDUCATION

KPR Institute of Engineering and Technology

Coimbatore, India

B.E. Computer Science and Engineering

2023–2027

CGPA: 9.36

Vivekananda Vidyalaya Matric Hr. Sec. School

Tirupur, India

Completed K-12 Schooling

TECHNICAL SKILLS

- **Programming:** Python, Java, C, SQL
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
- **Networking:** TCP/IP, IP Addressing, Routing, Switching, Network Troubleshooting, CCNA Fundamentals
- **Software Engineering:** SDLC, Agile Development, Debugging, Technical Troubleshooting, Root Cause Analysis, Software Testing Fundamentals
- **Machine Learning:** Supervised Learning, Unsupervised Learning, Feature Engineering, Data Preprocessing, Model Evaluation
- **Libraries:** NumPy, Pandas, Scikit-Learn, TensorFlow (Basics), Matplotlib
- **Tools:** Git, GitHub, Jupyter Notebook, Power BI, Hostinger, Canva, Figma
- **Coding Profiles:** LeetCode (115+ Problems Solved in DSA), CodeChef (Rating: 912), HackerRank (3 Stars - Java)

EXPERIENCE

Full Stack Developer Intern – Bhogan Mediasoft

Jun 2025 – Jul 2025

- Developed scalable full-stack web applications with focus on performance, maintainability and user experience.
- Optimized backend workflows and database operations, improving application responsiveness and efficiency.
- Diagnosed and resolved application issues through debugging, testing and technical troubleshooting.
- Deployed and maintained production-ready applications while following software development best practices.

PROJECTS

Speak2Sign – AI-Based Dual Communication System

- Developed an AI-powered accessibility platform enabling seamless communication between hearing-impaired and non-impaired individuals.
- Designed speech-to-sign and sign-to-text workflows using machine learning techniques for real-time interaction.
- Implemented preprocessing pipelines for speech and gesture recognition to improve prediction accuracy.
- Applied AI and automation concepts to solve real-world accessibility challenges through intelligent communication.

AI-Powered Airbase Foreign Object Detection and Removal System (In Progress)

- Developing a computer vision-based runway monitoring system for automated foreign object detection.
- Applying machine learning and image processing techniques for object classification and localization.
- Enhancing model performance through data preprocessing, feature extraction and evaluation techniques.

SecureVote – Virtual Voting Application

- Developed a secure online voting platform enabling remote participation for eligible voters.
- Implemented authentication and validation mechanisms to ensure vote integrity and prevent duplicate voting.
- Designed scalable backend workflows supporting transparent and reliable election processes.

CERTIFICATIONS

- CCNA: Switching, Routing and Wireless Essentials – Cisco Networking Academy
- CCNA: Enterprise Networking, Security and Automation – Cisco Networking Academy
- Introduction to Modern AI – Cisco Networking Academy
- NPTEL – Business Intelligence and Analytics (70%)

LEADERSHIP

- President, Rotaract Club – KPR Institute of Engineering and Technology (2025–2026)
- Secretary, IEEE Computer Society (2026–2027)
